- o Turn-Around Time
- o CPU Time
- o Applications
 - o Advancing Front
 - o Prismatic Elements
 - o Delaunay (Steiner Triangulation)

JAMSHID SAMAREH-ABOLHASSANI

REQUIREMENTS

Curves, Surfaces, Solids, Text

- o **Curves and Surfaces**

- o **Bicubic Patches**
- o **Conic Sections**
- o **Splines (any order)**
- o **B-Splines**
- o **Parametric Splines**
- o **Points and Tabulated data**
- o **Ruled Surfaces**
- o **Surfaces of Revolution**
- o **Trimmed Surfaces**

**Non-Uniform
Rational
B-Splines
(NURBS)**

JAMSHID SAMAREH-ABOLHASSANI

REQUIREMENTS Cont.

- o **Spacing**
- o **Stretching**
- o **Over 50 Surfaces**
NURBS, Trimmed
- o **User Input**
Turn-Around Time (Day)
- o **Adaptivity**
- o **Parametric Study**

JAMSHID SAMAREH-ABOLHASSANI

REQUIREMENTS Cont.

Few Surfaces
Simple Configurations

Present

Lots of Patches
More User's Time

Lots of Surfaces
Complex Configurations

Future

Few Patches
Less User's Time

JAMSHID SAMAREH-ABOLHASSANI

Advancing Front

JAMSHID SAMAREH-ABOLHASSANI

METHODS

- o 2D (Planes, Triangulation is performed in the parameter space)
- o 2 1/2 D (Triangulation is performed in the Parameter Space)
- o 3D (Triangulation is performed in the Physical and Parameter Spaces)

JAMSHID SAMAREH-ABOLHASSANI

2D (PLANES)

- o Exact
- o No Shearing (Exact shape and size)
- o Speed (0)

JAMSHID SAMAREH-ABOLHASSANI

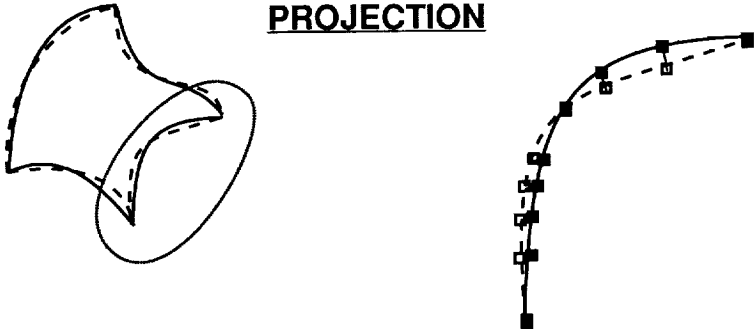

2½D Advancing Front Type I

JAMSHID SAMAREH-ABOLHASSANI

PROJECTION

The diagram on the left shows a curved surface patch, possibly a wing section, with dashed lines indicating its boundaries and internal structure. The diagram on the right shows a curve defined by a series of control points (squares) connected by a dashed line, illustrating the concept of projection in surface modeling.

Cons:

- o Shearing
- o Speed (1)
- o 3/4 Sided-Patches Only
- o More Patches Are Needed

Pros:

- o Surfaces Are Exact
- o Multiple Surfaces
- o T-Connections

JAMSHID SAMAREH-ABOLHASSANI

X-15

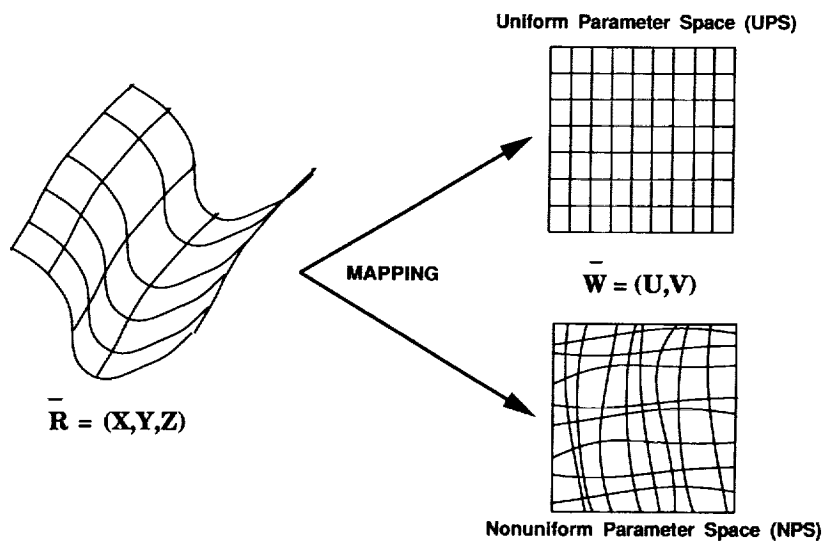

2½D Advancing Front Type II (Parametric Representation)

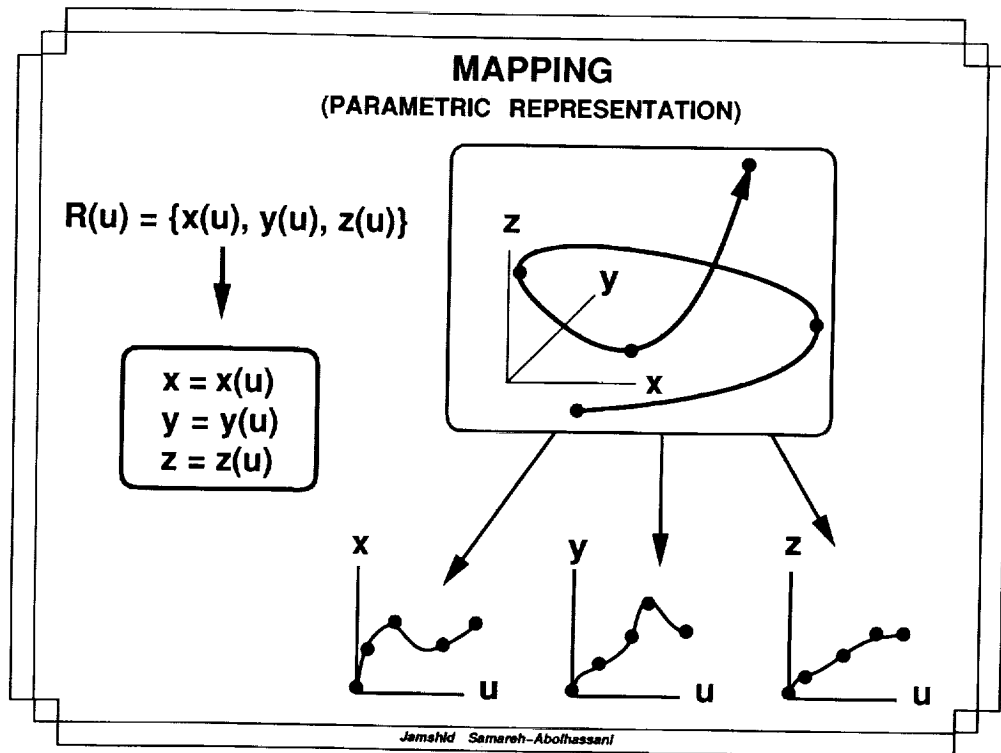

JAMSHID SAMAREH-ABOLHASSANI

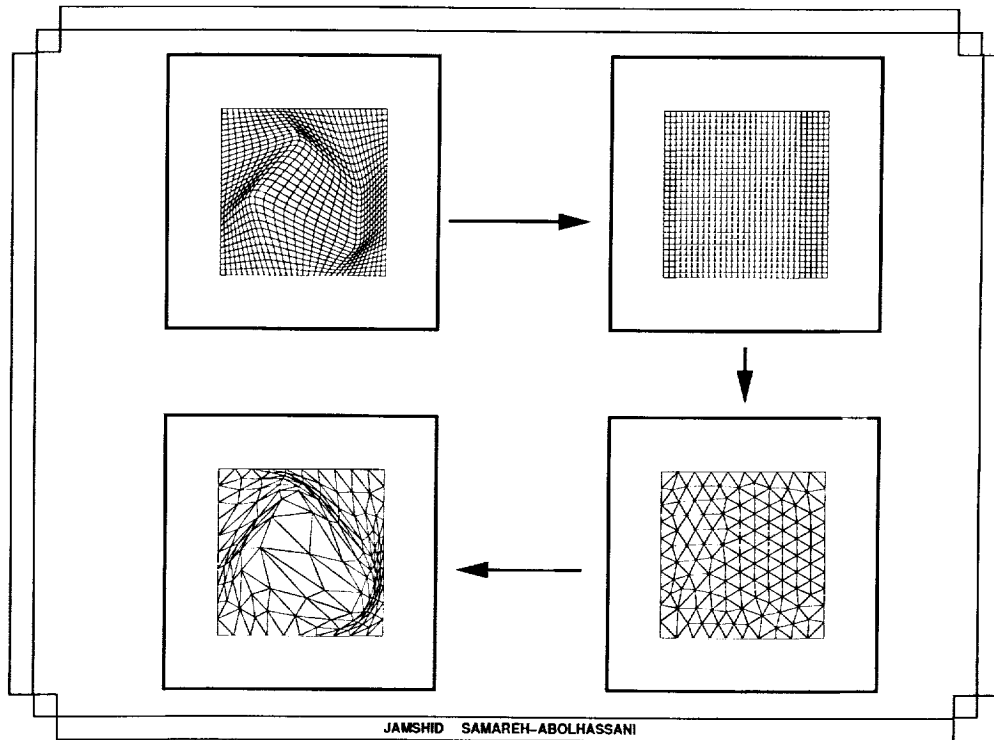

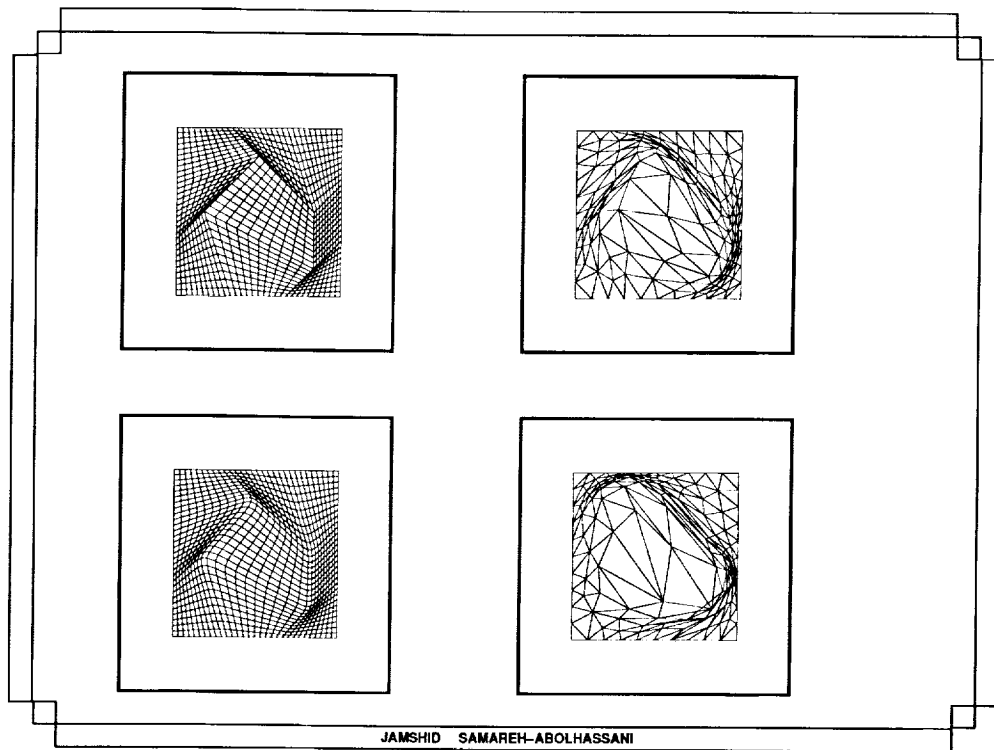

2½D Advancing Front Cont.

Jamshid Samareh-Abolhassani

Cons

- o Metrics Transformations
- o Speed (2)
- o One Surface Only
- o Singularity Could Cause Problems

Pros

- o Exact Surface
- o N-Sided Patches
- o Trimmed Surfaces
- o Fewer Patches
- o No Shearing (?)

JAMSHID SAMAREH-ABOLHASSANI

3D Advancing Front Curved Surfaces

- o Surface Points
- o Surface Normals
- o Loops in 3D

JAMSHID SAMAREH-ABOLHASSANI

PROJECTING POINTS ONTO NURBS SURFACES

AIAA-93-3454

JAMSHID SAMAREH-ABOLHASSANI

Steps:

1. Compute a plane normal to (P_1, P_2, S)
2. Generate a New Point (P'_3) on the Plane (Spacing and Stretching)
3. Project Point (P'_3) onto the Appropriate Surfaces
4. Compute a Plane Based on (P_1, P_2, P'_3)
5. Repeat Steps 2-4 Till Changes in P'_3 Are Very Small

JAMSHID SAMAREH-ABOLHASSANI

3D Advancing Front

Curved Surfaces

Cons:

- o Surface Normals Are Required
- o Projection Is Required
- o Trimmed Surfaces
- o Speed (4)

Pros:

- o Triangulation Is Performed in the Physical Space
- o No Shearing Due Parameter Space
- o Metric Transformation Is not Needed
- o N-Sided Patches with With Multiple Loops
- o Multiple Surfaces
- o Fewer Patches

JAMSHID SAMAREH-ABOLHASSANI

	2D	Type I 2½ D	Type I 2½ DP	Type 2 2½ D	3D

JAMSHID SAMAREH-ABOLHASSANI

CSC/GEOLAB/TAB EFFORT

- o NURBS Based (IGES , NASA IGES)
 - o NURBS Surfaces
 - o NURBS Curves
 - o Trimmed Surfaces
- o Points (network)
- o Single Interactive Interface
- o Surface Grid Generation
 - Based on 3D Advancing Front
- o Projection

JAMSHID SAMAREH-ABOLHASSANI

STEPS

- o STEP 1 POINTS/CURVES/PATCHES
 - o allowing for future additions
 - o Surface (points)
 - o create points/curves/patches for vgrid3d (or other systems)
- o STEP 2 Background Grid
- o STEP 3 PROJECTION/SMOOTHING/QUALITY CHECK
- o STEP 4 ADD SURFACE GRID GENERATION
(Direct Surface Triangulation)
- o STEP 5 MOTIF / X BASED (other platform)
